

▲PHILIPS SHOWLINE

SL Bar 640

The Showline SL Bar 640 is a 4-foot LED linear luminaire offering high output and color clarity. Ideal for any worship facility, it may be used for general illumination or direct view purposes, and its uniform, homogenized RGBW output makes a bold statement.

▲PRG

TruColor HS

TruColor HS eliminates the color-accuracy issues inherent in LED lighting by utilizing Remote Phosphor Technology (RPT). The result: a volume of accurate, consistent soft light that provides twice the output of a traditional 2kW incandescent fixture using less than 400 watts. HS provides 3,200K and 5,600K from a single fixture.

▲PRISM PROJECTION

Reveal Profile Junior

The Profile Junior is a 10,000-lumen LED profile spot that initially offers three models—3,200K, 5,600K, and tunable (2,800-5,600K) white light—all in a new compact design that is compatible with existing industry-standard lens tubes. The Profile Junior is designed for use in many applications, including long throw front-of-house lighting positions.

▲SEACHANGER

SeaChanger LED

Marrying SeaChanger's dichroic CMY color mixing with an LED light engine, the SC LED provides 4,250 lumens of output with a power draw of 165 watts. It features a continuously variable CTO filter, which ranges from 4,800K-2,800K, with the CMY color filters and is compatible with all ETC Source Four lens tubes.

▲ROBERT JULIAT

Tibo LED Profile

Tibo combines standard Robert Juliat features with a 75-watt LED source producing output equal to a traditional 575-watt fixture. It features two zoom ranges—30-degree/45-degree and 15-degree/35-degree; plastic, glass, or metal M-size gobos; and a 360-degree rotating lens. Available in three correlated color temperatures—warm white (3,000K), neutral white (4,000K), and cool white (6,500K). Maximum power consumption is 95 watts.
